CROP DAMAGES  
BOOST GRAINSReport From Kansas Indicates  
Big Drop in  
Wheat Yield

CHICAGO, May 21.—The report from Kansas today indicated a big drop in wheat yield, which would boost grain prices. The report stated that the wheat crop in Kansas was estimated to be 100,000 bushels less than last year. This would result in a shortage of wheat, which would drive up prices. The report also stated that the corn crop in Kansas was estimated to be 100,000 bushels less than last year. This would also result in a shortage of corn, which would drive up prices. The report also stated that the soybean crop in Kansas was estimated to be 100,000 bushels less than last year. This would also result in a shortage of soybeans, which would drive up prices.

## CONSERVATIVE INVESTMENTS

7% to 8%

Why not invest regularly a portion of your income and build your financial future?

You owe it to yourself in so far as possible to protect your funds against unwise investments.

If conservative investment counsel is your need, we offer the advice of our organization. In placing thousands of mortgages with hundreds of investors during the past twenty-five years no investor has ever suffered the loss of a dollar on one of our mortgage loans, or waited a day for interest or principal.

There is no more absolutely perfect security than a well-selected farm mortgage.

We offer you the benefit of our experience acquired during a quarter of a century devoted exclusively to Oklahoma real estate mortgage investments.
